Instead, a Virtual Machine software can work wonders It doesn't slow down your PC, and you don't have to make do with a poorly designed interface that makes your device look like it's still in the 90s.. Is there a Garageband for Desktop? Up until very recently, I believed there was no way to get the app to run on a Windows PC.. • At least 4 GB RAM in your PC We know this method works for Windows 8 and 10, and many confirm it works for their Windows 7 as well.. There are still a hundred blogs on the internet telling people to use emulators like iPadian or Cydia to run Garageband for PCs and Android devices..
